Value Added Engineering

Angus Fire – Foam Storage Vessel

In September 2009 we were successful in being awarded our second project by Kidde to Fabricate a Skid frame, removable sunshade and stainless steel foam tank and pipework (design code was ASME) this time destined for Petrofac in Syria.

Our scope of work included:

- Fabrication of Pipe Spools. Supply to include flanges.
- All lifting eyes.
- Manufacture of Earth Bosses and Earthing Stud kits
- Supply of all stud bolts (nuts and washers), gaskets, 'U' bolt pipe clamps and fasteners to facilitate assembly.
- Assembly of pipe spools, Inductor, Gate valves, check valves, isolation and drain valves and fitting of name plate, equipment and termination Point Tags.
- Installation and supply of cathodic isolation kits fitted between inductor and stainless steel pipe spools.
- Installation of instrumentation (pressure transducers and magnetic level gauges)
- To carry our Positive Material Identification (PMI)
- Painting of frame
- Radiography and NDE
